

ZUMA

product data

interior and exterior cladding options. adhered or mechanically fixed. suitable for use in rainscreen systems.
highly durable and low maintenance wall solutions in varying sizes, weights and thicknesses for ease of installation.

test results

freeze thaw: no change (25 cycles)
UV stability: yes

technical summary

weight (lb/sq.ft): 3/8" = 5 10mm = 25
(kg/m2): 1" = 12.5 25mm = 63
1 1/4" = 15.5 30mm = 75
size/rectangularity: ± 0.75mm
thickness: will vary, not a fully gauged product
max curvature: ± 0.5 percent of max tile length

installation

substrate: level and to support tile load
adhesive: laticrete 254R platinum rapid
grout joint: minimal joint - 1/16"
process: adhesive installation
or
mechanical fix installation
(anchor/z clip)
clean: hand scrub with scotch brite pad
neutral detergent (non-acidic)
seal: quality impregnator

contact our technical team for assistance related to your specific installation. we also offer sealer, buffing pads and contractor services in an effort to streamline your procurement process and better support your project.

using our specification recommendations ensures the best outcome for your project.
